# i4Trust

Data Spaces for effective and trusted data sharing

Are you a DIH? Are you looking for new paths to enrich your portfolio of services and be a protagonist of the new European Data Strategy around the creation of Data Spaces?

i4Trust is the answer to bring your ideas to life!

🌐 i4Trust Website   🌐 i4Trust Community

i4Trust for tomorrow's data sharing needs

i4Trust is based on the integration of open standard-based iSHARE and FIWARE Building Blocks, compatible with CEF Building Blocks, to provide Data Spaces for effective and trusted data sharing.

Data Models & Formats

Data Exchange API

Provenance & Traceability

Identity Mgmt & Autentication

Trusted Exchange

Access & Usage Control

Metadata & Discovery Services

Publication & Marketplace Services

Data Usage Accounting

Operational Agreements

Legal Agreements

Governance

The benefits of joining the i4Trust Community as a DIH

Join a network and grow-up with peers.

Be part of a space where DIHs and experts jointly help companies understand the power of sharing data to deliver cost-efficient innovative services. Learn how iSHARE and FIWARE Building Blocks help to realize Data Spaces for effective and trusted data sharing.

Get support and training.

Choose a senior engineer with a wide background in Big Data who will make "Local Expert in Data Spaces". Each selected DIH will receive free offline/online training and access to exciting and valuable bootcamps to receive official certification in Data Sharing Enablers.

Raise funding.

You have the opportunity to raise funding for SMEs in your network and your DIH itself through the Open Calls launch. This is your chance to lead developments towards innovative Data Sharing Services. You will receive an immediate first return on investment for your work!

The benefits of joining the i4Trust Community as a DIH

Be a distinguished ambassador.

As a DIH joining the Community, you become an i4Trust Ambassador, sharing i4Trust best practices and promoting all expertise acquired from the data sharing training. You disseminate new open calls in your ecosystem and scout the most promising and cutting-edge experiments throughout diverse countries to preselect potential candidates for the i4Trust Open Calls.
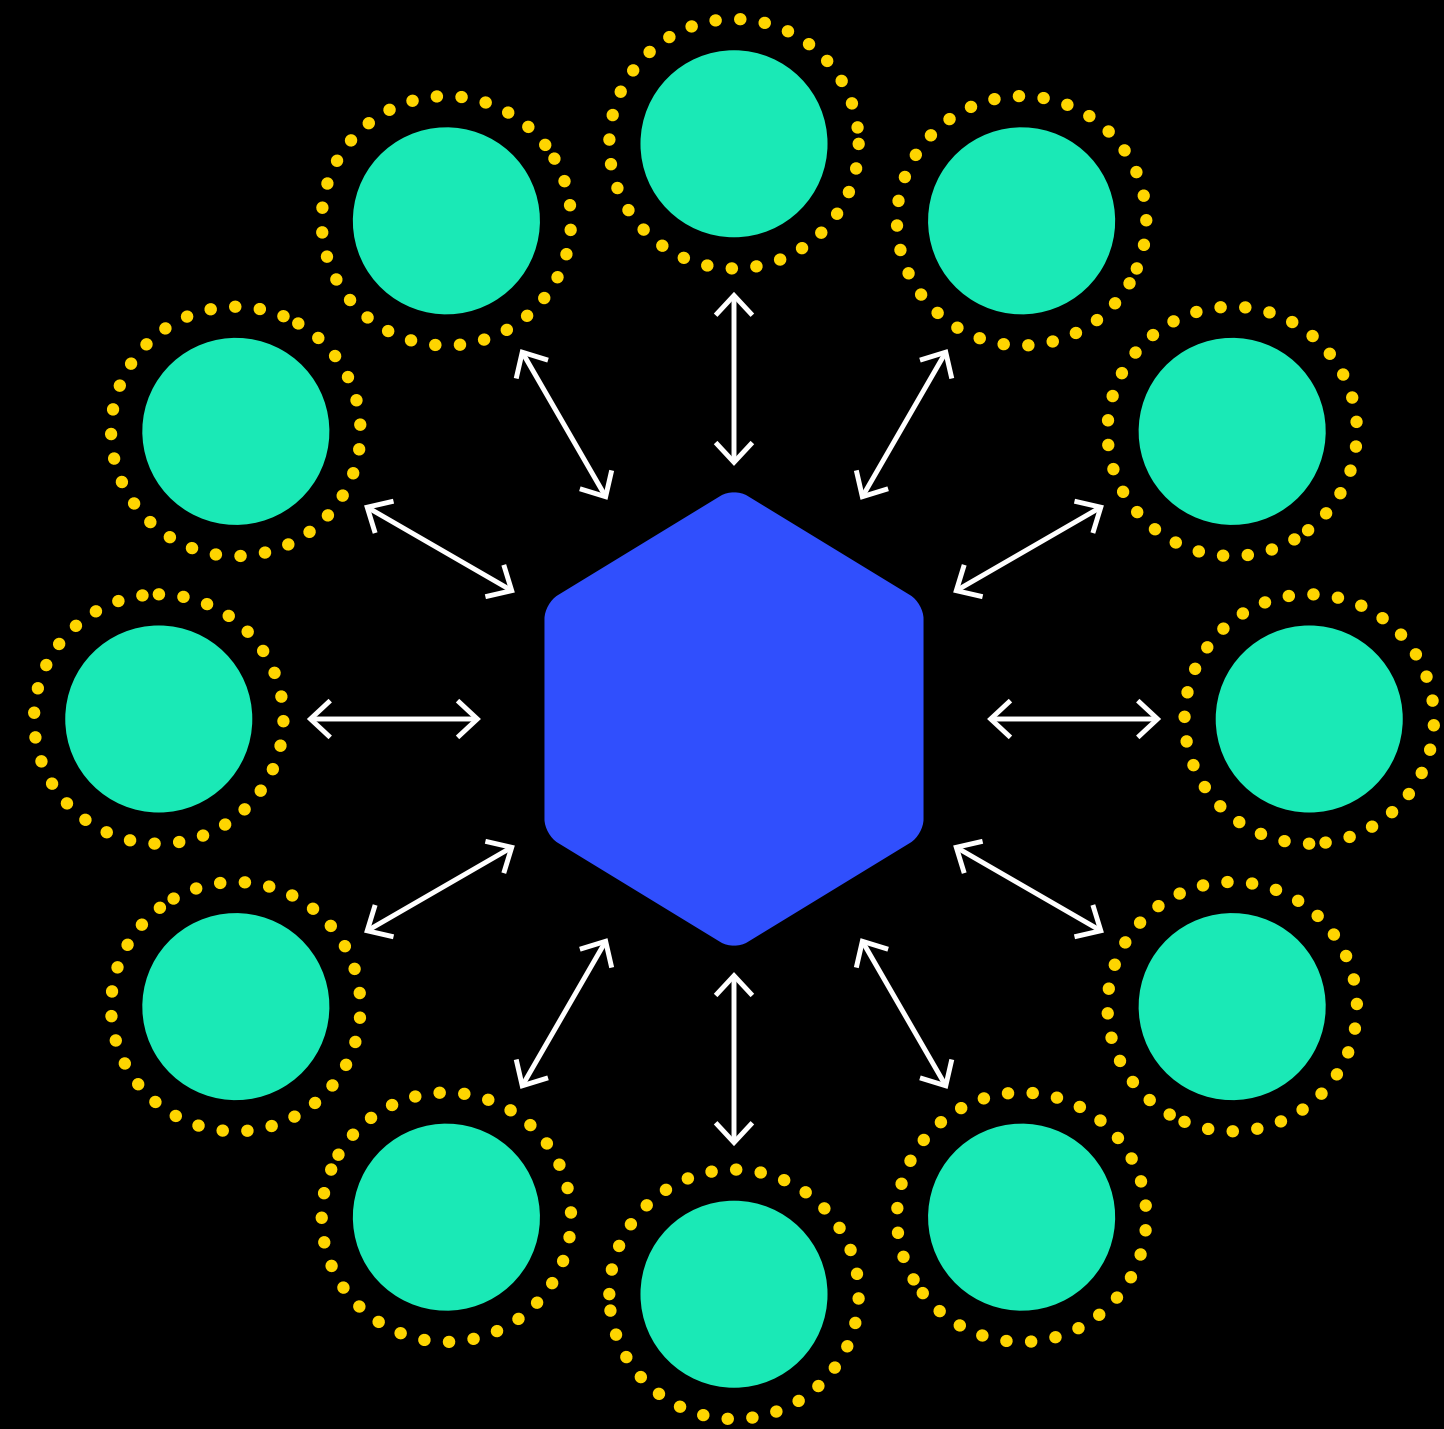

Drive inspired impact.

Together with distinguished members of the i4Trust Industrial Value Chain Advisory Board, you have the opportunity to formulate the challenges of i4Trust Open Calls. The i4Trust project focuses on the creation of new data value chains - involving different actors from multiple sectors - which can be replicated in different countries or act across borders.

Experiments, grants and global visibility

i4Trust follows a driven-by-implementation approach, based on Bottom-up-Experiments that will publish and share data among multiple participants.

Objectives include the creation of new data-driven business models across diverse industries' value chains.

i4Trust Data Spaces for Effective and Trusted Data Sharing

🌐 **i4Trust Website**   🌐 **i4Trust Community**
Experiments, grants and global visibility

1 Build up a **consortium composed of one DIH and a minimum of three SMEs** to receive **funding** (up to **120K € equity free!**).

2 Gain access to exclusive **business and technical mentoring** and coaching sessions for the entire finance-cycle!

3 Become a certified expert using i4Trust components for data sharing, an additional **digital qualification level of your DIH**.

4 Be part of an **exclusive international ecosystem** where you share know-how and explore new business opportunities.

5 **Co-organize** and **get on stage** at local and global events, information sessions, webinars and bootcamps to bring insights to light. Bring into view the latest technology achievements and business trends on Data Spaces together with our **international partners**!

Join the i4Trust Community!

Become a front-runner at the
forefront of the Data Spaces
revolution: gain traction,
grow and scale ideas of SMEs
in your community.
